

SEPTA®
Mouth Spray

INFORMATION ABOUT SEPTA

SEPTA mouth spray contains 0.12% Chlorhexidine digluconate with menthol and eucalyptus.

Chlorhexidine digluconate is a broad-spectrum antimicrobial with demonstrated activity against both gram-positive and gram-negative bacteria, yeasts, and viruses.

SEPTA mouth spray is used for the following conditions:

- For the treatment and prevention of gum diseases and as an adjunct to scaling and root planning
- To promote the reduction and elimination of dental plaque
- To prevent the spread of coronavirus and other types of viruses and bacteria
- To control mouth ulcers and oral candida infection
- To maintain oral hygiene and restore fresh breath

DIRECTIONS FOR USE

Spray SEPTA into the oral cavity with 3 to 4 pumps of the spray, 3 or 4 times a day.

- Children under 12 years of age should not use the product unless recommended by a healthcare professional.

TAKE SPECIAL CARE WITH SEPTA

- No special precautions are recommended in case of pregnancy or lactation.

STORAGE

Store at controlled room temperature (up to 25°C), protected from light and humidity, beyond the reach of children. The expiry date is printed on the pack; don't use this product after this date.
