

SEPTA®
Mouthwash

INFORMATION ABOUT SEPTA

SEPTA mouthwash contains 0.12% Chlorhexidine digluconate with menthol and eucalyptus.

Chlorhexidine digluconate is a broad-spectrum antimicrobial with demonstrated activity against both gram-positive and gram-negative bacteria, yeasts, and viruses.

SEPTA mouth wash is used for the following conditions:

- For the treatment and prevention of gum diseases
- To promote the reduction and elimination of dental plaque
- To prevent the spread of coronavirus and other types of viruses and bacteria
- To control mouth ulcers and oral candida infection
- To maintain oral hygiene and restore fresh breath

DIRECTIONS FOR USE

In addition to daily brushing, rinse your mouth with 10 mL SEPTA mouthwash for 1 minute, 3 or 4 times a day.

- Spit out after rinsing.
- Do not rinse with water, brush your teeth or eat immediately after using septa mouthwash.
- Children under 12 years of age should not use this product unless recommended by a healthcare professional.

TAKE SPECIAL CARE WITH SEPTA

- This product is for oral use only. Do not swallow. Avoid contact with the ears and eyes. If contact occurs, rinse eyes thoroughly with water.
- In case of pregnancy or lactation, contact your doctor before using this product.

STORAGE

Store at controlled room temperature (up to 25°C), protected from light and humidity, beyond the reach of children. The expiry date is printed on the pack; don't use this product after this date.
